Opis produktu

Riex EO30 Cover for LED Profile Available in several finishes, these covers provide optimal light diffusion and protect LED strips from dust, moisture, and mechanical damage. The opal variant reduces luminous flux by approximately 25%, creating a softer and more ambient lighting effect, while the transparent option ensures maximum brightness. Available in various lengths. The Riex EO30 Cover is perfect for both residential and commercial applications. Crafted from durable materials, these covers offer long-lasting performance while adding a clean, professional finish to your lighting designs. Installation is effortless, ensuring a seamless fit for your LED profiles. Key Features: Protective Barrier: Shields LED strips from environmental factors like dust and moisture. Professional Appearance: Enhances your lighting setup with a polished, modern look. Easy Installation: Quick to mount, ensuring hassle-free setup. Versatile Design: Suitable for various applications with a choice of lengths and finishes.
